

PHOTOGRAPHY BY MILLARD M.GRIFFIS

Artist Statement

My fascination with photography began very early in life. As a young adult, this fascination quickly became a passion. My experience includes small, medium and large format films as well as experimentation with newer technologies. I have exhibited my work in many art shows, galleries, and individual events winning awards throughout the years.

I have found that black and white film and the large format camera allow me the freedom of expression that I desire, while leaving me with a greater sense of satisfaction for the work. I perform all aspects of the process from the camera set, film processing, hand printing of each silver gelatin print to the final presentation. My process is slow, thoughtful and time consuming. The intent is to experience time while creating art that captures and conveys the state of mind in each moment.

The greatest reward for me is seeing the expression of an individual as they view and become a part of the original visualization of my impression in art.
