## *About the Artist . . .*

Inspired by the beauty of Key West and the Golden Isles of Georgia, the essence of his work is to take high resolution photographs and digitally enhance them to create an artwork reflective of the mood when the original image was captured. The process results in an oil, watercolor or paint and ink effect for the finished piece.

A long-time resident of St. Simons Island and a part-time resident of Key West, Elexis McGrath is a member of the Coastal Photographers Guild, the Jekyll Island Arts Association, the Florida Keys Council of the Arts, and a juried member of the Glynn Art Association. His award-winning PhotoArt appears in the 2011 edition of Keys Culture Magazine and also on the opening slide show of The Florida Keys Council of the Arts website.
